LETTER OF TRANSMITTAL

House of Representatives,
Committee on Science and Technology,
Washington, DC, September 4, 1986.

To the Members of the Task Force on Science Policy:

This Background Report entitled, "Bibliography of Studies and Reports on Science Policy and Related Topics, 1945–1985" constitutes Part A of a two-part comprehensive bibliography covering studies and reports in the field of science policy which have been published since 1945. Part B, which is issued separately, includes the studies and reports issued by the National Academy of Sciences over the same time period.

The bibliography is arranged in eight parts and subparts, and we are indebted to the many experts who contributed of their experience and knowledge to make each of these listings as complete as possible. Part I, the Bibliography of Major Science Policy Studies and Reports was compiled by Mr. William Boesman of the Congressional Research Service; Part II, the Bibliography of Congressional Hearings and Reports was compiled by Mr. Michael Davey of the Congressional Research Service; Part III, the Bibliography of Studies and Reports on Science and Engineering Education and Manpower was compiled by Dr. Alan Fechter, Executive Director, and Dr. Gwendolyn Lewis of the Office of Scientific and Engineering Personnel, National Research Council; Part IV–A, the bibliography of science policy reports issued by the General Accounting Office was compiled by Mr. Howard Gobstein of the GAO; Part IV–B, the bibliography of titles issued by the Congressional Research Service was compiled under the direction of Ms. Genieve Knezo with the assistance of several colleagues at the Science Policy Research Division (the reports and studies appearing here is a selection from a more extensive list covering, as well, technology and technology policy reports); Part IV–C, the bibliography of reports by the Office of Technology Assessment was compiled by the Committee staff and was reviewed and added to by Mr. Barry Holt of the OTA; Part IV–D, the bibliography of reports by the Congressional Budget Office was compiled by the Committee staff; and Part V, the Bibliography of Historical Studies Covering Federal Research Agencies since 1945 was compiled by Dr. Jeffrey K. Stine, a historian who served as a Congressional Fellow with the Task Force. In some cases, especially for the bibliography of Congressional hearings and reports, additional entries were provided by members of the Committee staff.

We believe that this bibliography provides a valuable overview of the many science policy studies that have been conducted in the forty years since the Bush Report was written in 1945. We commend it to the attention of the members of the Science Policy Task Force, the members of the Committee on Science and Technology and to the members of the House with an interest in the evolution of science policy studies in the United States.

MANUEL LUJAN, Jr.,	DON FUQUA,
Ranking Republican Member.	*Chairman.*
